

HOW TO STAY SAFE ONLINE ...

- Be careful and think about how much you share online.
- Never give out your full address or phone number to people you don't know.

- Make sure your social network profiles are private.
- Treat your password like your toothbrush – don't give it out and change it regularly.

- Consider who you become 'friends' with online – not everyone is who they say they are.
- Never meet up with anyone you meet online if you don't know them in 'real' life without a parent or guardian.

- Respect Others – you can't see how your words will affect people
- If you are sending unkind messages to people you may be committing a criminal offence.
- Don't retaliate and screen shot or save any nasty messages you receive. Block the bullies.

- Don't send rude pictures of yourself – they can easily be sent on to someone else.
- You may be committing a criminal offence if you share a photo that was sent to you, with other people.

- Cybermentors.org.uk

- Getsafeonline.org
- Nspcc.org.uk

- Ceop.police.uk
- Call Childline on 0800 11 11

- Think before you post – whatever goes online can be shared and you could lose control of who sees it.
- Be careful about the photos you share – do they give away lots of information about you?

- If something doesn't feel right or safe it probably isn't. Talk to someone you trust.
- All Social Network sites and YouTube have 'report' buttons. Use them.
